

February 10, 2011

Hon. Mark Leno Senator, 3<sup>rd</sup> District Room 5100, State Capitol Sacramento, California 95814

Dear Senator Leno:

This letter responds to your request that our office develop a list of alternative actions to balance the 2011-12 state budget assuming that the Legislature or the voters reject the Governor's major tax increase and tax extension proposals. Consistent with your staff's directions to us, the alternatives described in this letter include only the following:

- Expenditure reductions.
- Shifts, or transfers, of existing state or local funds to benefit the General Fund.
- Increases of non-tax revenues.

We were informed that we were to include neither additional proposals that needed voter approval to achieve savings nor additional borrowing from special funds.

#### BACKGROUND

Our Overall Approach. We were asked to assume that all of the Governor's non-tax-related budget proposals—which principally consist of spending reductions—are adopted and achieve their full intended savings in 2011-12. These proposals already involve significant reductions in virtually all state program areas. In coming up with additional solutions of roughly the same magnitude, we have had to identify alternatives involving major reductions in service and benefit levels and dramatic changes in the way that many programs would be delivered by the state and local governments. While we have recommended in recent years some variation of many of the alternatives provided in this letter, we have had to go far beyond our normal comfort level in order to meet the requested solutions target. Some of the listed actions would have serious impacts on individuals, programs, and local governments. As such, our alternatives described below should be viewed as an illustration of the types of solutions that would be needed under your given scenario.

Amount of Alternative Actions Required. The Governor's budget includes \$14 billion of proposed revenue increases. Consistent with your staff's instructions, we assume that only four of these revenue proposals are approved: the tax amnesty, the Financial Institutions Records Match system, the extension of the existing Medi-Cal hospital fee, and the continued collection of charges assessed on managed care plans. The administration estimated that the net revenue

increase from these proposals in 2010-11 and 2011-12 would equal \$515 million. We also assume the accuracy of the administration's 2010-11 and 2011-12 forecasts for revenues, the economy, caseloads, and other "baseline" program costs. Finally, we assume that the Legislature's final budget package includes a state budget reserve of around \$955 million at the end of 2011-12 (consistent with the Governor's budget proposal). We would also note that the Governor's recent decision not to proceed with the sale/lease-back of state buildings and to offer alternative actions may lead to some diminution of our suggested solutions.

Given these assumptions, alternative actions needed to balance the 2011-12 budget must produce General Fund savings of \$13.5 billion. Accordingly, this letter identifies \$13.5 billion of alternate budget-balancing options for the Legislature. The General Fund benefits listed for some of the options represent our initial estimates. Should the Legislature wish to pursue any of these options, refinement of these savings estimates would be required.

Full-Year 2011-12 Savings Still Require Early Legislative Action. We attempted to identify alternate budget actions with a realistic chance of achieving budgeted savings for 2011-12. While cuts of this magnitude inherently carry significant legal and implementation risks, we have tried to minimize these risks and incorporate our best understanding of current case law and other limitations on spending reductions. In general, our alternatives assume a full year of savings in 2011-12. Given federal notice requirements regarding many programs, implementation planning time needed for both the state and local governments, and the need for voter approval for a few of our alternatives, the Legislature would need to adopt many proposals by early March 2011.

### **ALTERNATIVE BUDGET ACTIONS**

Figure 1 (next page) provides a summary of the alternative budget actions we have identified and their estimated General Fund benefit in 2011-12. (A more detailed list is included in this letter's appendix.) The \$13.5 billion of budget-balancing alternatives are displayed by major policy area: K-14 education (\$5.2 billion), higher education (\$1.1 billion), health and social services (\$1.2 billion), criminal justice and the judiciary (\$2.6 billion), general government and local government (\$1.8 billion), and resources and transportation (\$1.6 billion).

Alternatives for Education. The K-14 and higher education budgets present some unique issues in arriving at our alternative budget actions. We discuss these issues in more detail below.

#### K-14 Education

The result of removing the Governor's tax proposals is an approximately \$2 billion decline in the Proposition 98 minimum guarantee for 2011-12. Balancing the budget with the constraints you have given us, however, would require even larger reductions in K-14 funding. As such, our list of alternatives includes a total of \$4.8 billion in Proposition 98 reductions—\$2 billion due to the assumed rejection of the Governor's tax proposals, plus an additional \$2.8 billion to help bring the budget into balance. In this scenario, a suspension of Proposition 98 in 2011-12 would be required. (When Proposition 98 is suspended, a "maintenance factor" obligation is created that requires funding eventually to be returned to the higher long-term level that would have resulted absent the suspension.)

Many Options Could Be Coupled With Policy Changes to Reduce Costs. Figure 2 illustrates the manner in which Proposition 98 reductions could be allocated. In several cases, we identify policy changes intended to help school districts cope with the loss of funding. For example, the state could eliminate the K-3 Class Size Reduction (CSR) program and allow classes in the early grades to exceed 20 students. The state also could modify recent statute to require children to be five years of age prior to enrolling in kindergarten beginning in 2011-12. As a result of this policy change, we estimate approximately 135,000 students (as measured by average daily attendance) would no longer enroll. This, in turn, would allow many districts to reduce the number of kindergarten classes they offer and kindergarten teachers they hire—potentially

Total, K-14 Education	\$5,239

reducing costs statewide by roughly \$700 million. Similarly, the state could stop requiring home-to-school transportation services (though schools would not be prohibited from offering such services) as well as eliminate certain mandated education activities. For community colleges, the state could allow individuals possessing a bachelor's degree or higher (and perhaps a high-school teaching credential or other coursework) to teach credit basic-skills courses (rather than requiring a master's degree). Colleges also could be permitted to contract out basic-skills instruction to a third party, such as a community-based organization or local library.

We have included in our Proposition 98 alternative a 2.2 percent reduction in K-12 general purpose funding. While not shown in Figure 2, we would recommend that the state take various actions to help districts deal with this reduction. For example, the state could amend statute to allow school districts to shorten the school year. For every one-day reduction in instruction, we estimate costs are reduced statewide by roughly \$200 million (with a reduction of one week yielding roughly \$1 billion in savings). To further reduce school district costs, the state could remove restrictions on contracting out for noninstructional services and eliminate priority and pay rules for substitute teaching positions. We think these are better alternatives than making large unallocated reductions that are not linked to cost-reduction measures.

A Few Reductions Offset by Other Revenue Streams. In a few cases, options exist to mitigate the impact of K-14 reductions by relying on other revenue streams. For example, the state could give school districts access to existing restricted reserves and allow them to offset the reductions (to the extent possible). For example, the state could give districts access to about \$300 million in reserves associated with certain restricted programs. We also think the state could reduce the amount of categorical funding it provides to basic aid districts. Specifically, if a basic aid district has "excess" local property tax revenue to cover categorical program costs, then the state could stop providing the categorical payments in excess of the constitutionally required \$120 per student. It is unclear why the state traditionally has offered these state payments to districts that have sufficient local funds to cover associated costs. For community colleges, the state could authorize higher fee increases to offset reductions to apportionments.

#### **Higher Education**

Unlike most other areas of the budget, the Governor's proposal would eliminate a sizable percentage of the universities' General Fund support without specifying how those reductions would be accommodated. Specifically, the Governor has proposed unallocated reductions totaling \$1 billion for the two universities. Rather than build upon these unallocated reductions, we have identified a total of \$2.1 billion in allocated reductions for higher education (excluding community colleges), as summarized in Figure 3 (next page). In other words, we identify ways that the Governor's \$1 billion in savings could be achieved, plus an additional \$1.1 billion to help balance the budget under your scenario.

Reductions of this magnitude would negatively affect the availability and cost of educational opportunities for students. However, we believe that effects on higher educational access, affordability, and quality could be mitigated by targeting noninstructional areas of the higher education budget. As we outline in Figure 3, our identified savings could be achieved with no reduction to the University of California's (UC's) budgeted enrollment levels, and a 5 percent

reduction to the California State University's (CSU's) budgeted level. (The effect on actual CSU enrollment would be somewhat less, because CSU's current-year enrollment is already below this budgeted level.) Under our scenario, tuition at the universities would increase by about \$400 to \$450 per university student (beyond already-approved fee increases). However, the state's financial aid entitlement programs would be preserved, although qualifying income thresholds would be reduced somewhat to match federal eligibility criteria.

A significant percentage of the programmatic savings we identify comes from reductions to spending on personnel (\$408 million). The effect of such reductions on core instructional activities could be minimized by focusing on noninstructional activities. For example, the Legislature could direct a modest shift in the allocation of UC faculty time from research to teaching. By increasing the average UC faculty teaching load by one additional course every three years, the university could realize savings of almost \$100 million annually. If desired, reductions in research could be targeted at certain campuses in order to retain a strong research focus at UC's flagship campuses. Given that CSU faculty do not spend a large share of their time on research, savings in CSU personnel costs could instead by achieved by reducing faculty release time for sabbaticals and other noninstructional activities.

### IMPLICATIONS FOR 2011-12 AND BEYOND

General Fund Surplus at End of 2011-12, if All Assumptions Hold. If the Legislature were to adopt these additional alternatives in combination with the non-tax proposals in the Governor's budget, the 2011-12 budget would be balanced with an approximately \$1 billion reserve—based on all of the various assumptions described above. In reality, of course, many of the Governor's proposals and the alternatives described in this letter carry significant implementation risk. Accordingly, the chances are very high that some of the assumptions incorporated in this analysis would not hold. In other words, even if the state adopted all of the Governor's non-tax budget proposals and all of this letter's alternatives, there is a chance that 2011-12 would end in deficit.

Many Permanent Solutions Help the Out-Year Problem. The majority of the budget-balancing options described in this letter could be enacted as permanent solutions, thereby helping the state to address its stubborn out-year budget problem. (In fact, as ongoing solutions, these alternatives provide solutions lasting beyond the tax extensions' five-year time period.) Nevertheless, both the Governor's proposals and this list of alternatives include some one-time budget options, such as borrowing from other state funds in the Governor's budget. To fully address the out-year budget problem, the Legislature likely would need to take additional actions beyond those addressed in this letter.

Other Non-Tax Revenue Budget Actions Available. In identifying the budget actions that would be required to balance the 2011-12 budget, we worked within the parameters specified by your staff described at the start of this letter. There are a number of other, non-tax revenue budget actions that the Legislature could consider as alternatives to some of the program reductions included—such as additional borrowing from special funds and returning to the voters to change provisions of existing voter-approved programs. We estimate that these alternatives would generate on the order of several billions of dollars. (Additional borrowing from special funds alone could create \$1.2 billion in benefit to the General Fund in 2011-12.) Such actions could be used in place of some of the more difficult actions included on our list.

For more information, please contact Jason Sisney (916-319-8361, jason.sisney@lao.ca.gov) or Caroline Godkin (916-319-8326, caroline.godkin@lao.ca.gov) of my staff. They can direct you to the LAO analysts who are able to answer questions about specific items in our alternatives list.

Sincerely,
May Jush

Mac Taylor

Legislative Analyst
